# Dinosaur World

Dimorphodon

## Report

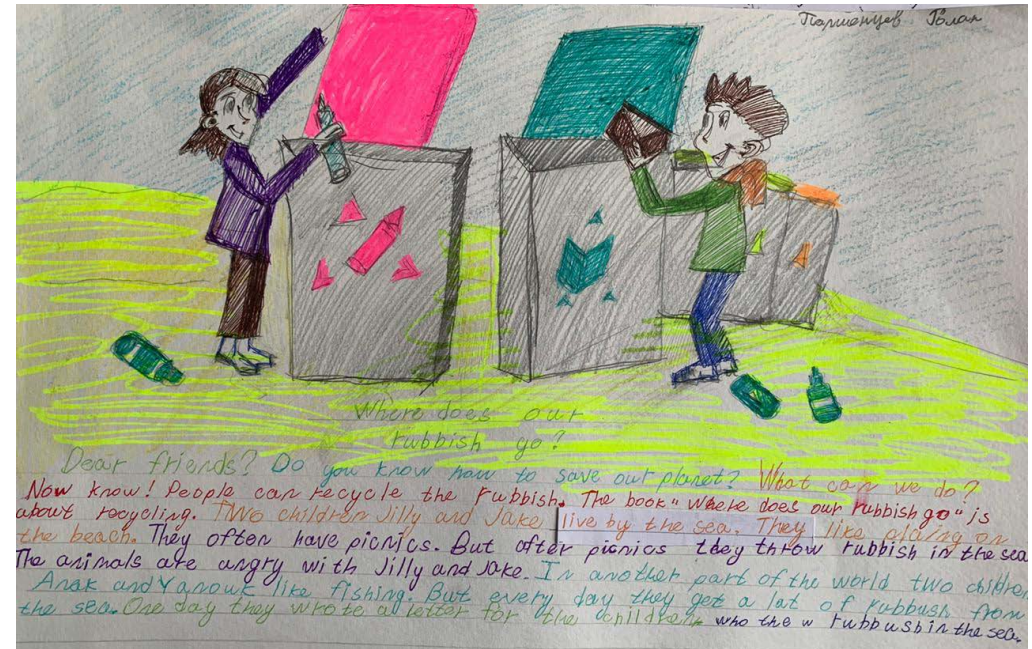

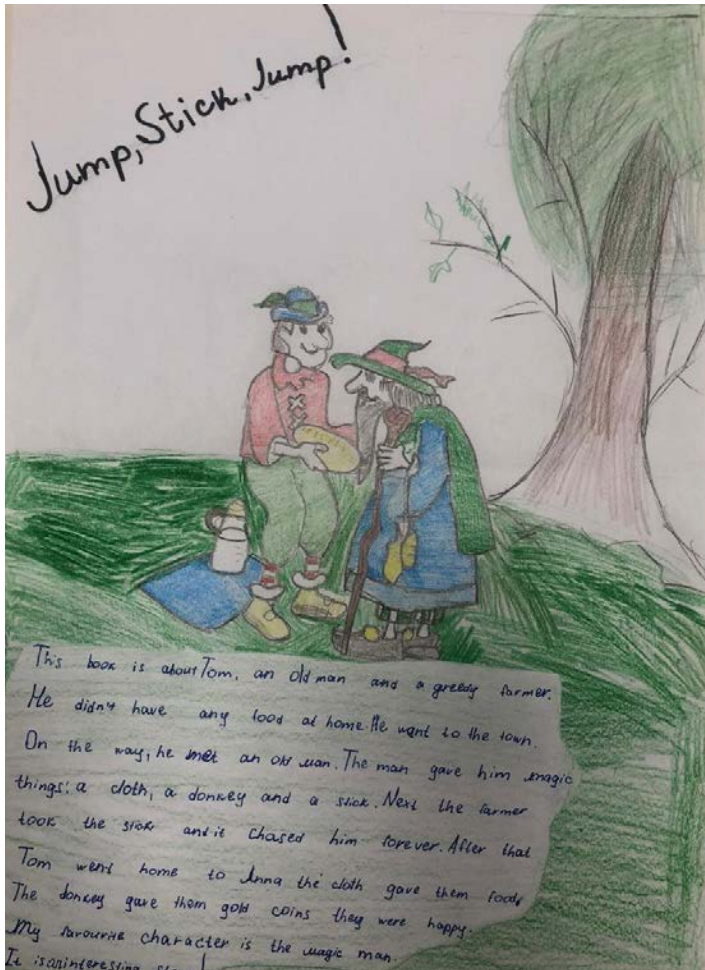

This summer I read a book, "Dinosaur World" by Llewellyn Claire. The book tells us that dinosaurs were the most important land animals of their time. Their period divided into three eras, Triassic, Jurassic, Cretaceous eras. Dinosaurs lived between about 250 million and 65 million years ago. This book discovers many types of dinosaurs. I learnt some facts about dinosaurs for example, their size, habitats, their food, period of life and also

danger rating. I found out that there were plant-eaters: Diplodocus, Stegosaurus, Dimorphodon, Duckbill dinosaurs, Maiasaura. And there were meat-eaters: Allosaurus, Deinonychus, Tyrannosaurus rex. But most of all I like Dimorphodon. It looked like a bird and it could fly. It had jaws and a lot of teeth. Its wings were skin, not feathers. I like it because it was not dangerous.

I recommend this book because it is interesting to know some facts about dinosaurs.

Ellie is happy. She has got a home and Percy is happy too. He is free.

He's got Ella's bone and he's very happy. It's time for the dog show. She doesn't want to go so she goes to the taxi. She can't go.

Ella is on the dog show. Miss Potter sees Ella instead of Percy. Ella runs away.

Look! She is at the dark room with some girl. There are some robbers.

Ella is running after them. She's trying to get the bone. There is a dog. He is running. Finally the bone and Ella are together. Every body is happy!

He looks in his guide book and says that the Prime Minister lives in Westminster. They want to go by bus there. Now the children are at the Prime Minister's house, but he isn't at home, he is working. He thinks that at tennis court at Wimbledon. The children travel to the Wimbledon tennis underground. Now Tim, Clara, Kate and Ph are in the tennis court. The Prime Minister. The children was him. He was there. After that tennis finishes, they gave him his wallet, the photographers take lots of photos.
